

EXTREME READER

FROM GUERRILLA TECHNOLOGIES

Extreme Reader from Guerilla Technologies sets a new standard in desktop reading devices. Three models serve readers of all computer comfort levels with ultra-reliable operation and clear, fluid speech output of today's popular media, including scanned print, text files on diskette, and DAISY-formatted CD books.

The new, more compact, Extreme Reader comes with built in speakers and can be used with a computer monitor or TV. All three models include a stacked scanning and reading unit and a custom keyboard with functions marked both visually and tactually. Other features include AT&T Natural Voices ® and world class scanning accuracy.

Model XR-10e, the ultimate hardware reading device for the power user at **\$3,500**, uses a twenty-two-operation keypad, saves, retrieves, and navigates through your documents with maximum precision, and has an internal file system to store and sort documents. This model can also drive your Enabling embosser directly, so you can scan and Braille a document in minutes.

Model XR-1, the new standard in hardware reading appliances at **\$2,925**, uses a sixteen-operation keypad. The XR-1 will save, retrieve, and navigate to and through your documents.

Model ER-1, the most basic easy-to-use system at **\$3,125**, uses a four-button keypad, enabling even the most computer-challenged readers to read in record-time.

All three models come with a print and floppy manual, a one year warranty and software or hardware updates for one year. As your needs change, all models are user upgradeable.

Hard copy Scanning and Reading
Daisy CD Book Reading
Floppy Diskette Reading
