

GEMINI PRINT & BRAILLE EMBOSSER

The Gemini Print and Braille Embosser from Nippon Telesoft produces **print with Braille in one simultaneous pass**, fulfilling a long-time dream of Braille producers everywhere. But that's not all that's different about Gemini.

You can't help but notice what's missing—embossing noise! **Gemini is so extraordinarily quiet** you won't need to exile it to a closet or a sound-muffling cabinet.

Gemini uses continuous form, narrow Braille paper (up to 10 inches wide), and you can choose regular or large print with Braille or Braille alone. With your Duxbury Braille Translator (DBT) software (sold separately), high-quality documents for all your readers are easier than ever to produce.
