

Phoenix

Braille Graphics Without Compromise!

Introducing **Phoenix**...the World's First Multi-Function Braille and Tactile Graphics System

Imagine the ability to scan your pictures, graphs and charts into your computer with your existing scanner and with a few clicks of the mouse emboss those images in high definition, tactile graphics without compromising the quality of your Braille text.

This is now possible with the Phoenix Embosser and Firebird Software Suite available from Enabling Technologies!

The Phoenix is our ninth generation of Braille embossing technology that has both our durable and legendary Romeo Braille Dot with a proprietary 25 DPI tactile graphics embossing system. All in one embosser! Now, there is no longer a need to settle for poor quality Braille text to achieve high definition tactile graphics, as is the case with most other products on the market.

- ❖ **Braille Quality that Exceeds ALL Standards Worldwide**
 - ❖ **Experience High Definition Braille Graphics without compromising the quality of standard Braille text**
 - ❖ **Includes the Firebird Software Suite of Productivity Tools**
 - ❖ **Backed by Enabling Technologies legendary Customer Support and 40 years of experience in embosser design and manufacturing**

The Firebird Software Suite (included with the Phoenix) is a comprehensive set of productivity tools that powers the Phoenix Embosser. The Firebird Software Suite includes the Firebird Transcriber that is a high quality, intuitive Braille translator and the Firebird Graphics Editor that provides you with a comprehensive list of automatic tools to effortlessly create tactile graphic images.

Price (includes the Phoenix Embosser and Firebird Software Suite): \$4,995.00 each plus \$95.00 S/H
